

# CONTENTS

## PART I ■ FUNDAMENTALS OF PROGRAMMING

### Chapter 1 Introduction to Computers, Programs, and Java

- 1.1 Introduction
- 1.2 What Is a Computer?
- 1.3 Programs
- 1.4 Operating Systems
- 1.5 (Optional) Number Systems
- 1.6 Java, World Wide Web, and Beyond
- 1.7 The Java Language Specification, API, JDK, and IDE
- 1.8 A Simple Java Program
- 1.9 Creating, Compiling, and Executing a Java Program
- 1.10 Anatomy of a Java Program
- 1.11 Displaying Text in a Message Dialog Box
- Key Terms
- Chapter Summary
- Review Questions
- Programming Exercises

### Chapter 2 Primitive Data Types and Operations

- 2.1 Introduction
- 2.2 Writing Simple Programs
- 2.3 Identifiers
- 2.4 Variables
- 2.5 Assignment Statements and Assignment Expressions
- 2.6 Constants
- 2.7 Numeric Data Types and Operations
- 2.8 Numeric Type Conversions
- 2.9 Character Data Type and Operations
- 2.10 The String Type
- 2.11 Getting Input from Input Dialogs
- 2.12 Case Studies
- 2.13 (Optional) Console Input Using the Scanner Class
- 2.14 Programming Style and Documentation
- 2.15 Programming Errors
- 2.16 Debugging

Key Terms  
Chapter Summary  
Review Questions  
Programming Exercises

## Chapter 3 Selection Statements

3.1 Introduction  
3.2 boolean Data Type and Operations  
3.3 if Statements  
3.4 switch Statements  
3.5 Conditional Expressions  
3.6 Formatting Console Output and Strings  
3.7 Operator Precedence and Associativity  
3.8 Operand Evaluation Order  
Key Terms  
Chapter Summary  
Review Questions  
Programming Exercises

## Chapter 4 Loops

4.1 Introduction  
4.2 The while Loop  
4.3 The do-while Loop  
4.4 The for Loop  
4.5 Which Loop to Use?  
4.6 Nested Loops  
4.7 Minimizing Numerical Errors  
4.8 Case Studies  
4.9 (Optional) Keywords break and continue  
Key Terms  
Chapter Summary  
Review Questions  
Programming Exercises

## Chapter 5 Methods

5.1 Introduction  
5.2 Creating a Method  
5.3 Calling a Method  
5.4 void Method Example  
5.5 Passing Parameters by Values  
5.6 Overloading Methods  
5.7 Case Study: Computing Taxes with Methods  
5.8 The Scope of Variables

UNCORRECTED PAGE PROOFS

- 5.9 The Math Class
- 5.10 Case Study: Generating Random Characters
- 5.11 Method Abstraction and Stepwise Refinement
- 5.12 (Optional) Packages
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 6 Arrays

- 6.1 Introduction
- 6.2 Array Basics
- 6.3 Copying Arrays
- 6.4 Passing Arrays to Methods
- 6.5 Returning an Array from a Method
- 6.6 (Optional) Variable-Length Argument Lists
- 6.7 Searching Arrays
- 6.8 Sorting Arrays
- 6.9 The Arrays Class
- 6.10 Two-Dimensional Arrays
- 6.11 (Optional) Multidimensional Arrays
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

# PART II OBJECT-ORIENTED PROGRAMMING

## Chapter 7 Objects and Classes

- 7.1 Introduction
- 7.2 Defining Classes for Objects
- 7.3 Constructors
- 7.4 Accessing Objects via Reference Variables
- 7.5 Using Classes from the Java Library
- 7.6 Static Variables, Constants, and Methods
- 7.7 Visibility Modifiers
- 7.8 Data Field Encapsulation
- 7.9 Immutable Objects and Classes
- 7.10 Passing Objects to Methods
- 7.11 The Scope of Variables
- 7.12 The `this` Keyword
- 7.13 Array of Objects

UNCORRECTED PAGE PROOFS

This material is protected under all copyright laws as they currently exist. No portion of this material may be reproduced, in any form or by any means, without permission in writing from the publisher.

- 7.14 Class Abstraction and Encapsulation
- 7.15 Case Study: The Loan Class
- 7.16 Case Study: The Course Class
- 7.17 (Optional) Case Study: The StackOfIntegers Class
- 7.18 (Optional GUI) Creating Windows
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 8 Strings and Text I/O

- 8.1 Introduction
- 8.2 The String Class
- 8.3 The Character Class
- 8.4 The StringBuilder/StringBuffer Class
- 8.5 Command-Line Arguments
- 8.6 (Optional) Regular Expressions
- 8.7 The File Class
- 8.8 Text I/O
- 8.9 (Optional GUI) Containers and Layout Managers
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 9 Inheritance and Polymorphism

- 9.1 Introduction
- 9.2 Superclasses and Subclasses
- 9.3 Using the super Keyword
- 9.4 Overriding Methods
- 9.5 Overriding vs. Overloading
- 9.6 The Object Class and Its toString() Method
- 9.7 Polymorphism, Dynamic Binding, and Generic Programming
- 9.8 Casting Objects and the instanceof Operator
- 9.9 The ArrayList Class
- 9.10 A Custom Stack Class
- 9.11 The protected Data and Methods
- 9.12 The final Classes, Methods, and Variables
- 9.13 (Optional) Methods in the Object Class
- 9.14 (Optional) Hiding Data Fields and Static Methods
- 9.15 (Optional) Initialization Blocks
- 9.16 (Optional GUI) Inheriting GUI Components
  - Key Terms

Chapter Summary  
Review Questions  
Programming Exercises

## Chapter 10 Abstract Classes and Interfaces

10.1 Introduction  
10.2 Abstract Classes  
10.3 The Calendar and GregorianCalendar Classes  
10.4 Interfaces  
10.5 Processing Primitive Data Type Values as Objects  
10.6 Automatic Conversion Between Primitive Types and Wrapper Class Types  
10.7 (Optional GUI) Handling GUI Events  
Key Terms  
Chapter Summary  
Review Questions  
Programming Exercises

## Chapter 11 Object-Oriented Design

11.1 Introduction  
11.2 The Software Development Process  
11.3 Discovering Class Relationships  
11.4 Case Study: Object-Oriented Design  
11.5 Case Study: The Rational Class  
11.6 Class Design Guidelines  
11.7 Modeling Dynamic Behavior Using Sequence Diagrams and Statecharts  
11.8 Framework-Based Programming Using Java API  
Key Terms  
Chapter Summary  
Review Questions  
Programming Exercises

## PART III GUI PROGRAMMING

### Chapter 12 Getting Started with GUI Programming

12.1 Introduction  
12.2 GUI Components  
12.3 The Java GUI API  
12.4 Frames  
12.5 Layout Managers  
12.6 The Color Class

UNCORRECTED PAGE PROOFS

This material is protected under all copyright laws as they currently exist. No portion of this material may be reproduced, in any form or by any means, without permission in writing from the publisher.

- 12.7 The Font Class
- 12.8 Using Panels as Subcontainers
- 12.9 Common Features of Swing GUI Components
- 12.10 Image Icons
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 13 Graphics

- 13.1 Introduction
- 13.2 Graphical Coordinate System
- 13.3 The Graphics Class
- 13.4 The paintComponent Method
- 13.5 Drawing Graphics on Panels
- 13.6 Drawing Strings, Lines, Rectangles, and Ovals
- 13.7 Case Study: The FigurePanel Class
- 13.8 Drawing Arcs
- 13.9 The Polygon class and Drawing Polygons and Polylines
- 13.10 Centering a Display Using the FontMetrics Class
- 13.11 Case Study: The MessagePanel Class
- 13.12 (Optional) Case Study: The StillClock Class
- 13.13 (Optional) Displaying Images
- 13.14 (Optional) Case Study: The ImageViewer Class
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 14 Event-Driven Programming

- 14.1 Introduction
- 14.2 Event and Event Source
- 14.3 Listeners, Registrations, and Handling Events
- 14.4 Mouse Events
- 14.5 Key Events
- 14.6 (Optional) Animation Using the Timer Class
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 15 Creating User Interfaces

- 15.1 Introduction

UNCORRECTED PAGE PROOFS

- 15.2 Buttons
- 15.3 Check Boxes
- 15.4 Radio Buttons
- 15.5 Labels
- 15.6 Text Fields
- 15.7 Text Areas
- 15.8 Combo Boxes
- 15.9 Lists
- 15.10 Scroll Bars
- 15.11 Sliders
- 15.12 Creating Multiple Windows
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 16 Applets and Multimedia

- 16.1 Introduction
- 16.2 The Applet Class
- 16.3 The JApplet Class
- 16.4 The HTML File and the <applet> Tag
- 16.5 Enabling Applets to Run as Applications
- 16.6 Passing Strings to Applets
- 16.7 (Optional) Case Study: TicTacToe
- 16.8 (Optional) Case Study: Bouncing Ball
- 16.9 (Optional) Locating Resource Using the URL Class
- 16.10 (Optional) Playing Audio
- 16.11 (Optional) Case Study: Multimedia Animations
- 16.12 (Optional) Packaging and Deploying Java Projects
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## PART IV EXCEPTION HANDLING, IO, AND RECURSION

### Chapter 17 Exceptions and Assertions

- 17.1 Introduction
- 17.2 Exception-Handling Overview
- 17.3 Exceptions and Exception Types
- 17.4 Understanding Exception Handling
- 17.5 The finally Clause
- 17.6 When to Use Exceptions

UNCORRECTED PAGE PROOFS

© 2007 Pearson Education, Inc., Upper Saddle River, NJ. All rights reserved.

This material is protected under all copyright laws as they currently exist. No portion of this material may be reproduced, in any form or by any means, without permission in writing from the publisher.

- 17.7 Rethrowing Exceptions
- 17.8 (Optional) Chained Exceptions
- 17.9 (Optional) Creating Custom Exception Classes
- 17.10 (Optional) Assertions
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 18 Binary I/O

- 18.1 Introduction
- 18.2 How Is I/O Handled in Java?
- 18.3 Text I/O vs. Binary I/O
- 18.4 Binary I/O Classes
- 18.5 Case Study: Copying File
- 18.6 Object I/O
- 18.7 (Optional) Random Access Files
- 18.8 (Optional) Case Study: Address Book
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 19 Recursion

- 19.1 Introduction
- 19.2 Example: Factorials
- 19.3 Example: Fibonacci Numbers
- 19.4 Problem Solving Using Recursion
- 19.5 Recursive Helper Methods
- 19.6 Tower of Hanoi
- 19.7 Fractals
- 19.8 Recursion versus Iteration
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## PART V DATA STRUCTURES

### Chapter 20 Lists, Stacks, Queues, Trees, and Heaps

- 20.1 Introduction
- 20.2 Lists

UNCORRECTED PAGE PROOFS

© 2007 Pearson Education, Inc., Upper Saddle River, NJ. All rights reserved.  
This material is protected under all copyright laws as they currently exist. No portion of this material may be reproduced,  
in any form or by any means, without permission in writing from the publisher.

- 20.3 Stacks and Queues
- 20.4 Binary Trees
- 20.5 Heaps
- 20.6 Priority Queues
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 21 Generics

- 21.1 Introduction
- 21.1 Motivations
- 21.3 Declaring Generic Classes and Interfaces
- 21.4 Generic Methods
- 21.5 Raw Type and Backward Compatibility
- 21.6 Wildcards
- 21.7 Important Facts
- 21.8 Avoiding Unsafe Raw Types
- 21.9 (Optional) Case Study: Generic Matrix Class
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 22 Java Collections Framework

- 22.1 Introduction
- 22.2 The Collection Interface and the `AbstractCollection` Class
- 22.3 Sets
- 22.4 The `Comparator` Interface
- 22.5 Lists
- 22.6 Static Methods for Lists and Collections
- 22.7 The `Vector` and `Stack` Classes
- 22.8 Queues and Priority Queues
- 22.9 (Optional) Maps
- 22.10 Singleton and Unmodifiable Collections and Maps
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 23 Algorithm Efficiency and Sorting

- 23.1 Introduction
- 23.2 Estimating Algorithm Efficiency

UNCORRECTED PAGE PROOFS

- 23.3 Bubble Sort
- 23.4 Merge Sort
- 23.5 Quick Sort
- 23.6 Heap Sort
- 23.7 External Sort
- Key Terms
- Chapter Summary
- Review Questions
- Programming Exercises

## PART IV CONCURRENCY, NETWORKING, AND INTERNATIONALIZATION

### Chapter 24 Multithreading Objectives

- 24.1 Introduction
- 24.2 Thread Concepts
- 24.3 Creating Tasks and Threads
- 24.4 The Thread Class
- 24.5 Example: Flashing Text
- 24.6 GUI Event Dispatcher Thread
- 24.7 (Optional) Case Study: Clock with Audio
- 24.8 Thread Pools
- 24.9 Thread Synchronization
- 24.10 (Optional) Synchronization Using Locks
- 24.11 (Optional) Cooperation Among Threads
- 24.12 (Optional) Case Study: Producer/Consumer
- 24.13 (Optional) Blocking Queues
- 24.14 (Optional) Semaphores
- 24.15 Avoiding Deadlocks
- 24.16 Thread States
- 24.17 Synchronized Collections
- 24.18 (Optional) JProgressBar
- Key Terms
- Chapter Summary
- Review Questions
- Programming Exercises

### Chapter 25 Networking

- 25.1 Introduction
- 25.2 Client/Server Computing
- 25.3 The InetAddress Class
- 25.4 Serving Multiple Clients

UNCORRECTED PAGE PROOFS

- 25.5 Applet Clients
- 25.6 Sending and Receiving Objects
- 25.7 Retrieving Files from Web Servers
- 25.8 JEditorPane
- 25.9 (Optional) Case Studies: Distributed TicTacToe Games
- 25.10 (Optional) Datagram Socket
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 26 Internationalization

- 26.1 Introduction
- 26.2 The Locale Class
- 26.3 Displaying Date and Time
- 26.4 Formatting Numbers
- 26.5 (Optional) Resource Bundles
- 26.6 (Optional) Character Encoding
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## PART VII ADVANCED GUI PROGRAMMING

### Chapter 27 JavaBeans and Bean Events

- 27.1 Introduction
- 27.2 JavaBeans
- 27.3 Bean Properties
- 27.4 Java Event Model Review
- 27.5 Creating Custom Source Components
- 27.6 (Optional) Creating Custom Event Sets
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

### Chapter 28 Containers, Layout Managers, and Borders

- 28.1 Introduction
- 28.2 Swing Container Structures
- 28.3 Layout Managers
- 28.4 Creating Custom Layout Managers
- 28.5 JScrollPane

UNCORRECTED PAGE PROOFS

- 28.6 JTabbedPane
- 28.7 JSplitPane
- 28.8 Swing Borders
- 28.9 (Optional) Pluggable Look-and-Feel
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 29 Menus, Toolbars, Dialogs, and Internal Frames

- 29.1 Introduction
- 29.2 Menus
- 29.3 Popup Menus
- 29.4 JToolBar
- 29.5 Processing Actions Using the Action Interface
- 29.6 JOptionPane Dialogs
- 29.7 Creating Custom Dialogs
- 29.8 JColorChooser
- 29.9 JFileChooser
- 29.10 (Optional) Creating Internal Frames
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 30 MVC and Swing Models

- 30.1 Introduction
- 30.2 MVC
- 30.3 MVC Variations
- 30.4 Swing Model-View-Controller Architecture
- 30.5 JSpinner
- 30.6 Spinner Models and Editors
- 30.7 JList
- 30.8 List Models
- 30.9 List Cell Renderer
- 30.10 JComboBox
  - Key Terms
  - Chapter Summary
  - Review Questions
  - Programming Exercises

## Chapter 31 JTable and JTree

- 31.1 Introduction
- 31.2 JTable
- 31.3 Table Models and Table Column Models

UNCORRECTED PAGE PROOFS

© 2007 Pearson Education, Inc., Upper Saddle River, NJ. All rights reserved.

This material is protected under all copyright laws as they currently exist. No portion of this material may be reproduced, in any form or by any means, without permission in writing from the publisher.

- 31.4 Case Study: Modifying Rows and Columns
- 31.5 Table Renderers and Editors
- 31.6 Custom Table Renderers and Editors
- 31.7 Table Model Events
- 31.8 JTree
- 31.9 `TableModel` and `DefaultTableModel`
- 31.10 `TreeNode`, `MutableTreeNode`, and `DefaultMutableTreeNode`
- 31.11 `TreePath` and `TreeSelectionMode`
- 31.12 Case Study: Modifying Trees
- 31.13 Tree Node Rendering and Editing
- 31.14 Tree Events
- Key Terms
- Chapter Summary
- Review Questions
- Programming Exercises

## PART VIII WEB PROGRAMMING

### Chapter 32 Java Database Programming

- 32.1 Introduction
- 32.2 Relational Database Systems
- 32.3 SQL
- 32.4 JDBC
- 32.5 `PreparedStatement`
- 32.6 Retrieving Metadata
- Chapter Summary
- Review Questions
- Programming Exercises

### Chapter 33 Advanced Java Database Programming

- 33.1 Introduction
- 33.2 A Universal SQL Client
- 33.3 Batch Processing
- 33.4 Scrollable and Updateable Result Set
- 33.5 `RowSet`, `JdbcRowSet`, and `CachedRowSet`
- 33.6 Storing and Retrieving Images in JDBC
- Key Terms
- Chapter Summary
- Review Questions
- Programming Exercises

UNCORRECTED PAGE PROOFS

## Chapter 34 Servlets

- 34.1 Introduction
- 34.2 HTML and Common Gateway Interface
- 34.3 Creating and Running Servlets
- 34.4 The Servlet API
- 34.5 Creating Servlets
- 34.6 HTML Forms
- 34.7 Database Programming in Servlets
- 34.8 Session Tracking
- 34.9 Sending Images from Servlets
- Key Terms
- Chapter Summary
- Review Questions
- Programming Exercises

## Chapter 35 JavaServer Pages

- 35.1 Introduction
- 35.2 A Simple JSP Page
- 35.3 How Is a JSP Page Processed?
- 35.4 JSP Scripting Constructs
- 35.5 Predefined Variables
- 35.6 JSP Directives
- 35.7 Using JavaBeans in JSP
- 35.8 Getting and Setting Properties
- 35.9 Associating Properties with Input Parameters
- 35.10 Forwarding Requests from JavaServer Pages
- 35.11 Case Study: Browsing Database Tables
- JSP Scripting Constructs Syntax
- JSP Predefined Variables
- Chapter Summary
- Review Questions
- Programming Exercises

## Chapter 36 Remote Method Invocations

- 36.1 Introduction
- 36.2 RMI Basics
- 36.3 Developing RMI Applications
- 36.4 RMI vs. Socket-Level Programming
- 36.5 Developing Three-Tier Applications Using RMI
- 36.6 RMI Callbacks

UNCORRECTED PAGE PROOFS
